HISTORY

***Do you play...
Table tennis? Or
Ping Pong?***

HISTORY

12th Century AD – The game of table tennis probably descended from the the game of “Royal Tennis” (also known as Real Tennis or Court Tennis), which was played in the medieval era.

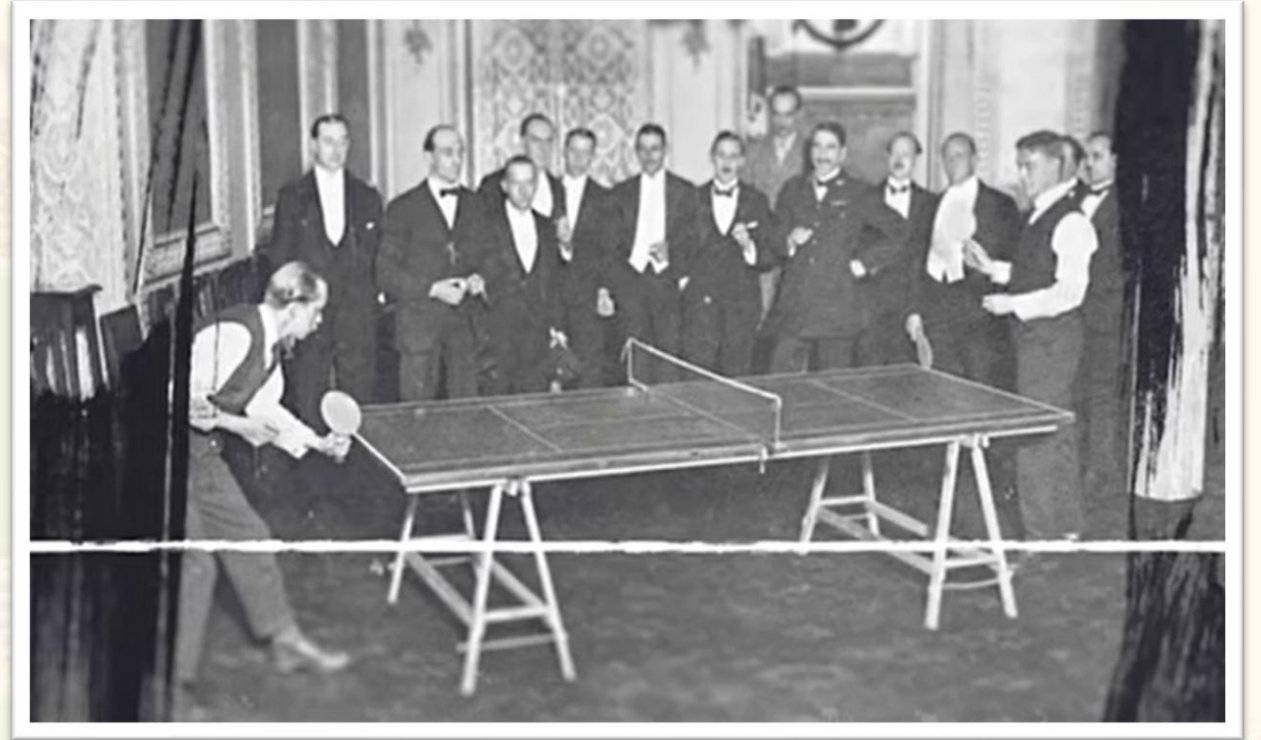

HISTORY

1880- Ping-pong started in **Victorian England** during an indoor parlor game. Wealthy upper-class families used dining tables, books for a net, cigar box lids for paddles, and champagne corks for balls to play a mini version of lawn tennis indoors during bad weather.

HISTORY

Early names included whiff-waff and flim-flam. The term "ping-pong" came from the sound of the ball.

HISTORY

According to the ITTF website, the first use of the name “Table Tennis” appeared on a board and dice game made by J.H.Singer of New York

Table Tennis Board & Dice Game, by J.H.Singer of New York, circa 1884. ©2003-2007 ITTF Museum. All rights reserved.

HISTORY

Today:

Table tennis has been an Olympic sport since **1988**.

International competitions follow rules established by the **International Table Tennis Federation (ITTF)**.

Table tennis is no longer simply a recreational indoor game it is a high-speed professional sport and a widely accessible activity for people of all ages.

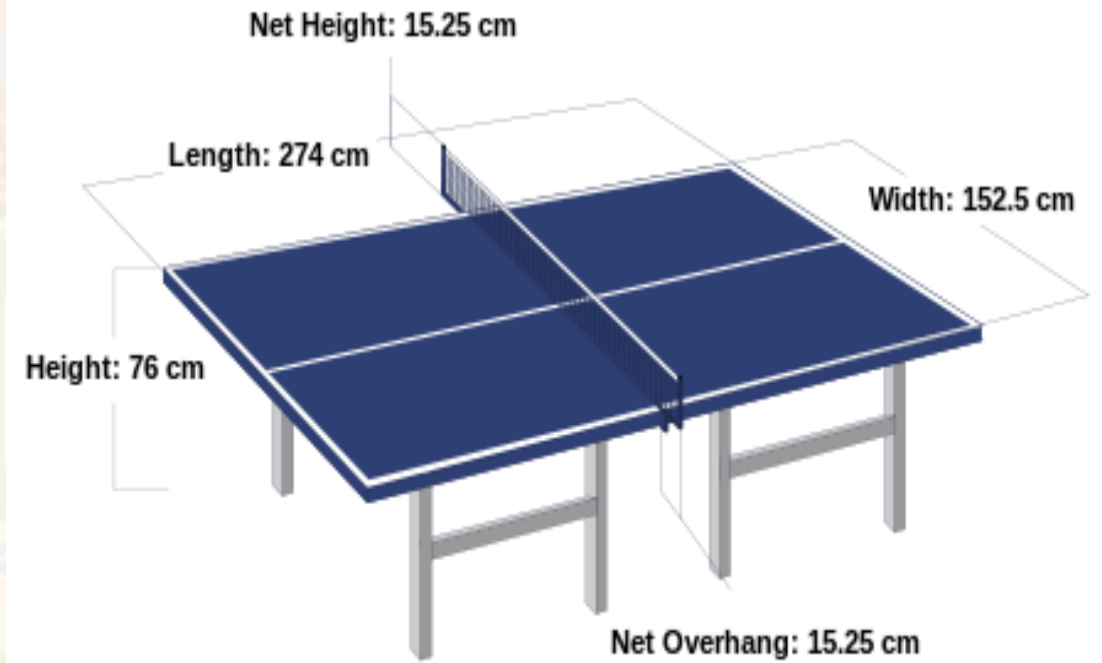

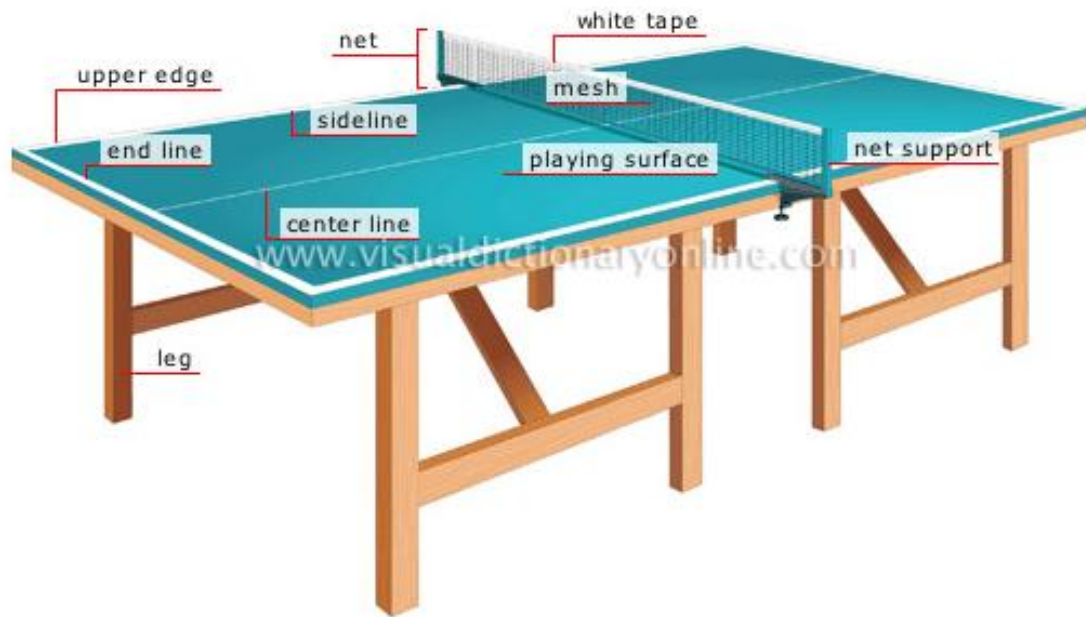

EQUIPMENT

PATHFIT 3

CAVITE STATE UNIVERSITY - TANZA CAMPUS

TABLE

RACKET or PADDLE

1. Wooden blade or blade

The blade is the core of the racket and its main purpose is to provide a surface for striking the ball. The blade is typically made from wood, but can also be made from other materials such as carbon fiber.

2. The rubbers

The rubbers are the surfaces that make contact with the ball and provide spin and speed.

3. The sponge

The sponge is a layer of material between the rubbers that provides additional bounce and speed.

4. The handle

The handle is the **part of the racket** that you hold onto, and it is typically made from wood, plastic, or composite materials

BALL

A standard table tennis ball is a hollow, spherical polymer sphere measuring exactly **40 millimeters** in diameter and weighing **2.7 grams**. Authorized colors for play are matte white or orange, and quality is typically marked by star ratings ranging from 1-star (training) up to 3-star (official tournament use).

SKILLS

PATHFIT 3

CAVITE STATE UNIVERSITY - TANZA CAMPUS

GRIPS

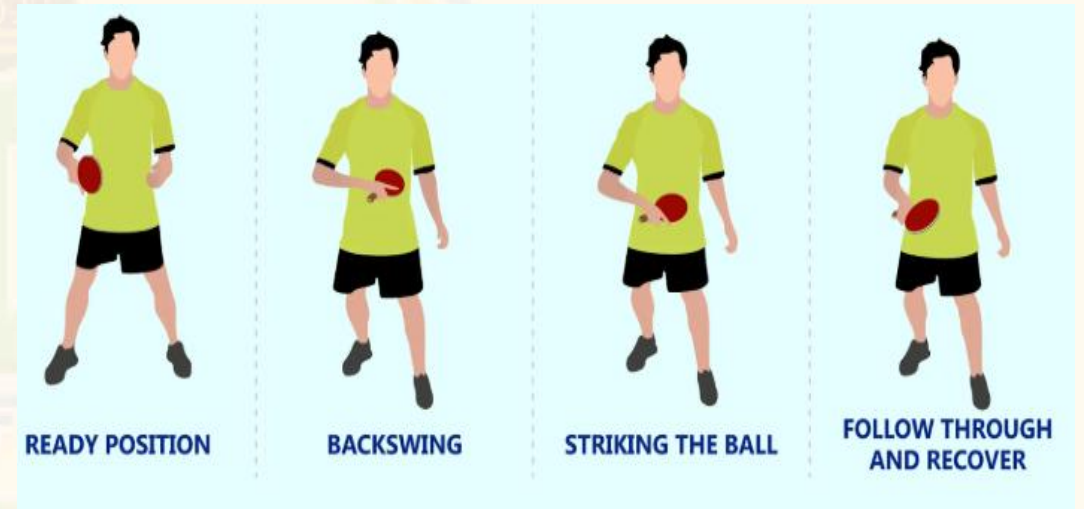

Grip – Holding the racket correctly gives better control.

STROKES

Strokes provide basic control shots, offensive attacks, and defensive plays.

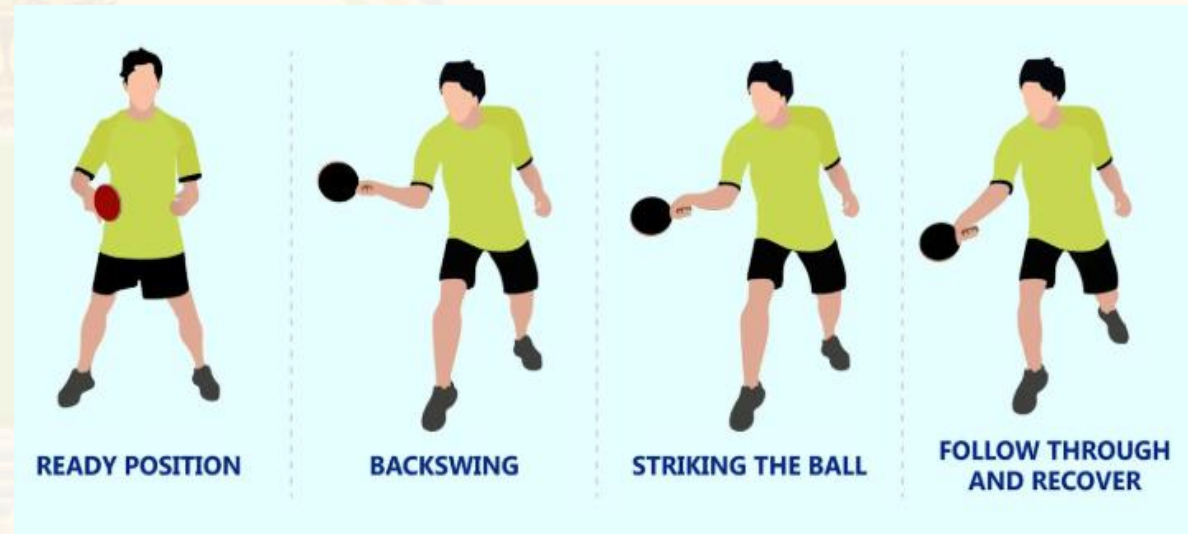

Backhand stroke/drive – A shot executed where the back of your hand is pointing towards the opponent, to the left of the elbow for a right-handed player and vice versa for a left hander player.

STROKES

Strokes provide basic control shots, offensive attacks, and defensive plays.

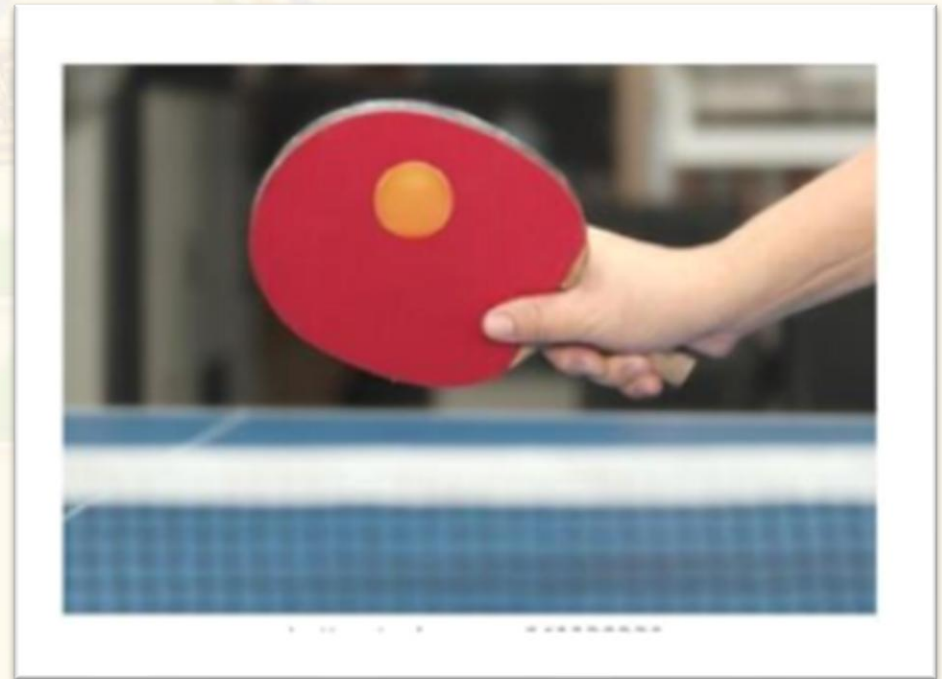

Forehand stroke/drive – A shot executed where the palm of your hand is facing your opponent, to the right side of the elbow for a right-handed player and vice versa for a left hander player.

STROKES

Strokes provide basic control shots, offensive attacks, and defensive plays.

Push in table tennis is a soft, defensive short-range stroke used to return an opponent's backspin or float serve

STROKES

Strokes provide basic control shots, offensive attacks, and defensive plays.

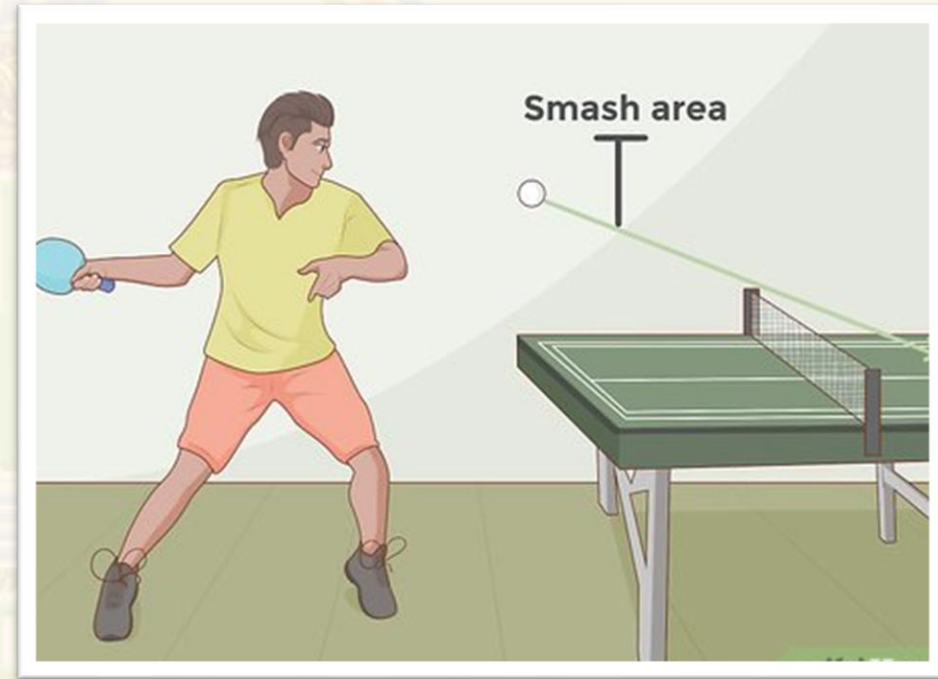

Block – Using the racket to control or redirect an opponent's attacking shot.

STROKES

Strokes provide basic control shots, offensive attacks, and defensive plays.

Smash – A powerful attacking stroke used to finish a point.

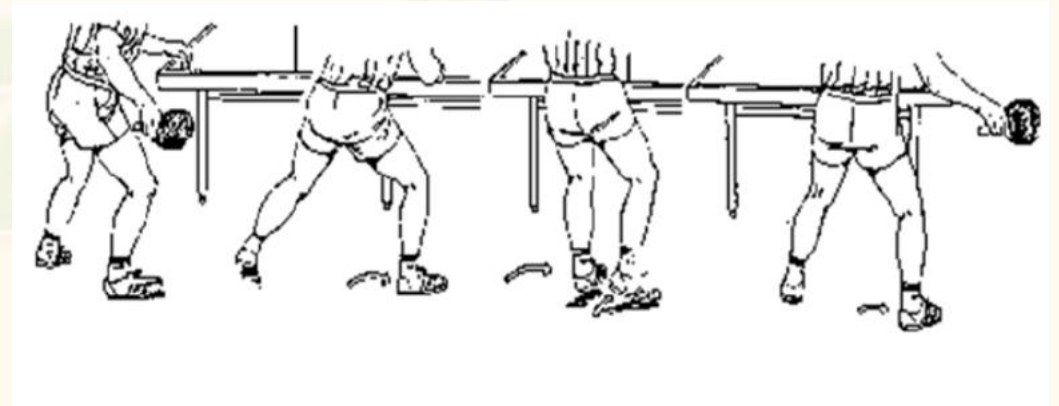

FOOTWORK

Footwork - Proper footwork would allow you to move more efficiently such that you would be able to execute better, more accurate returns.

Side to side Footwork

This is the main footwork pattern used in table tennis.

This is done swiftly when you are close to the table. Always move your outside foot whether you are moving to the left or right.

FOOTWORK

Footwork - Proper footwork would allow you to move more efficiently such that you would be able to execute better, more accurate returns.

Cross Over Footwork

When you need to return at a faster pace.

To move from the backhand side to the wide forehand side, you cross your leg foot wide to the right side. Then using the left foot as a pivot, shift your weight to your left foot.

FOOTWORK

Footwork - Proper footwork would allow you to move more efficiently such that you would be able to execute better, more accurate returns.

One step Footwork

This is used as a last resort when you have no time to react.

A one step movement is executed by pushing off with a stationary foot into a wider stance followed by playing of the ball and finally returning back to base position for better balance.

FOOTWORK

Footwork - Proper footwork would allow you to move more efficiently such that you would be able to execute better, more accurate returns.

Pivot Step

This occurs when you wish to play a forehand stroke from the backhand corner.

There are two different ways to accomplish this. Some players bring the right foot round behind the left and then adjust the left. Others move the left first a little out and then bring the right round after.

PIVOT STEP

1. Bring right foot back into position
2. Keep right foot behind left
3. Rotate upper body to play forehand

FOOTWORK

Footwork - Proper footwork would allow you to move more efficiently such that you would be able to execute better, more accurate returns.

Pivot Step

This occurs when you wish to play a forehand stroke from the backhand corner.

There are two different ways to accomplish this. Some players bring the right foot round behind the left and then adjust the left. Others move the left first a little out and then bring the right round after.

CONTACT

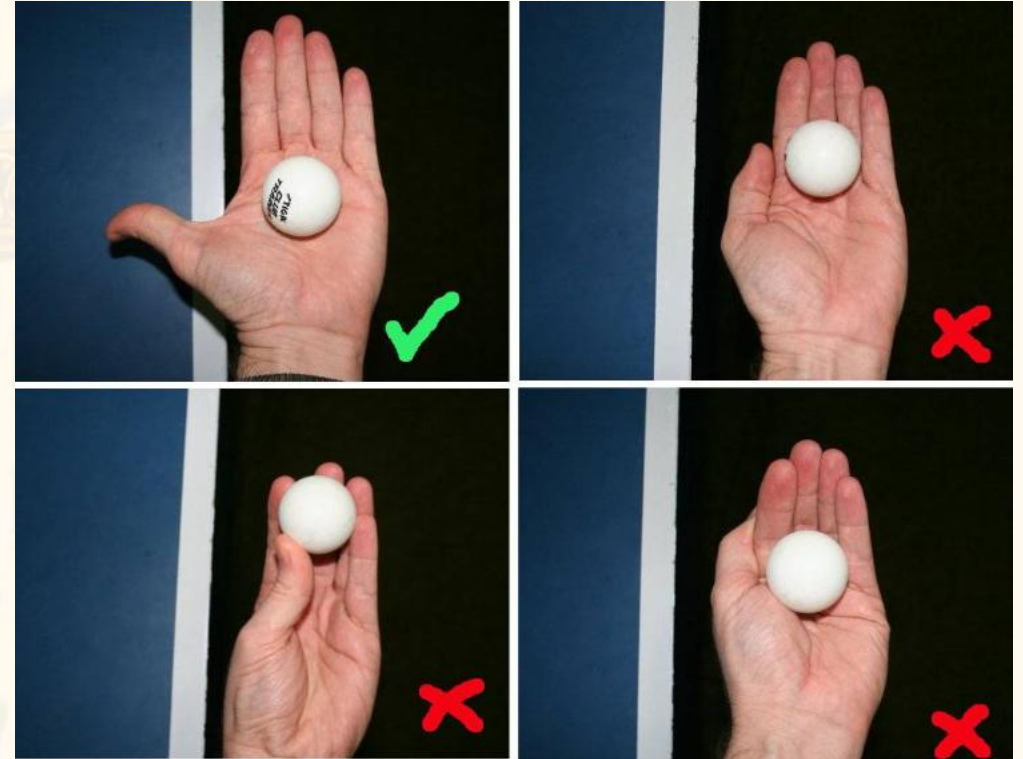

1. Play strong forehand drive
2. Body weight travels toward intended target
3. Recover by reversing movement and re-turning to ready position

Service

A basic legal serve requires the player to:

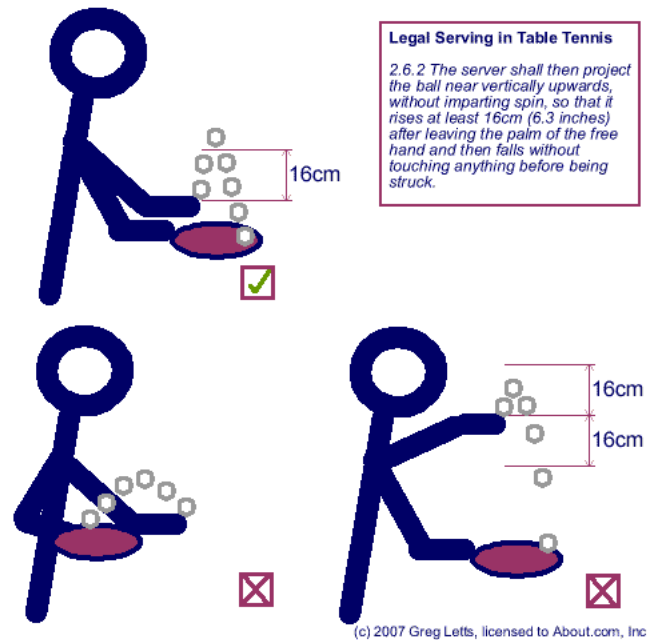

1. Place the ball on the **open palm of the free hand**.
2. Toss the ball upward before striking it.
3. Hit the ball so that it first bounces on the server's side and then on the receiver's side.
4. Keep the ball visible to the receiver during the service action.

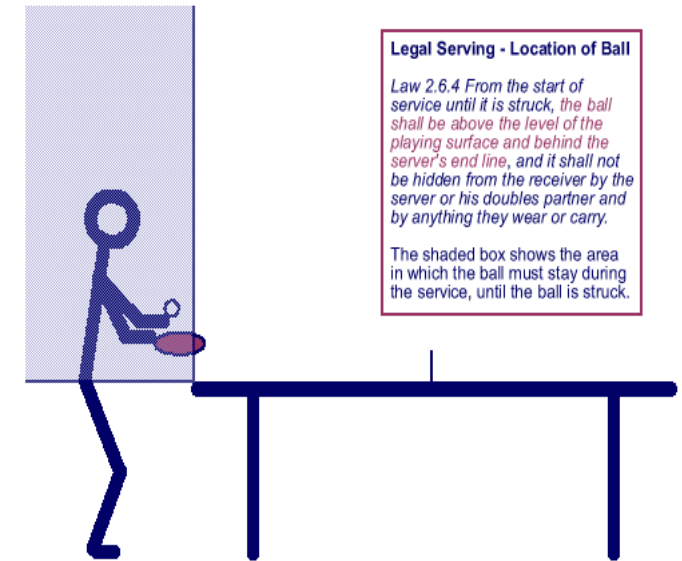

Service

A basic legal serve requires the player to:

The Ball Toss – Law 2.6.2

Ball Location During Service – Law 2.6.4

Ball location during the service. © 2007 Greg Letts

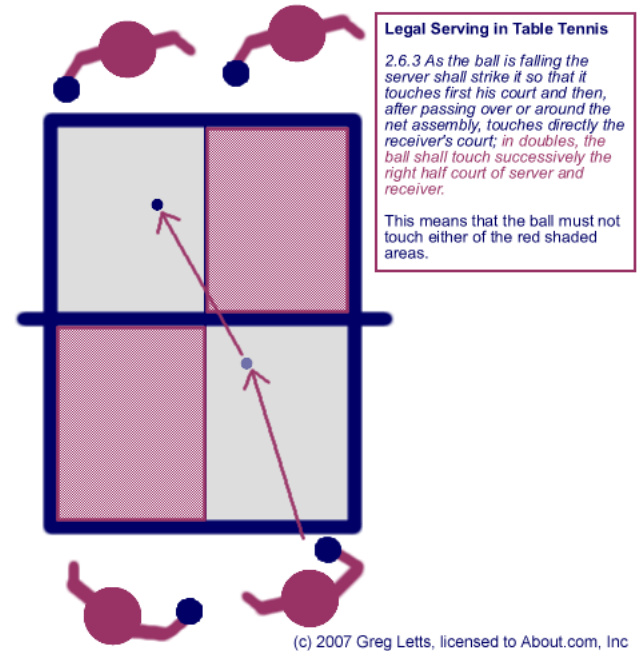

Service

A basic legal serve requires the player to:

Serving in Doubles – Law 2.6.3

Serving in Doubles. © 2007 Greg Letts

NOTE: In **singles**, the serve can generally be directed anywhere on the opponent's side. In **doubles**, the serve must go **diagonally from the right half of the server's court to the right half of the receiver's court**.

Basic Rules

PATHFIT 3

CAVITE STATE UNIVERSITY - TANZA CAMPUS

1. A match is normally played as **best of an odd number of games**, commonly best of 5 or 7.
2. A game is normally won by the first player or pair to reach **11 points**, provided they lead by at least **2 points**.
3. At **10–10**, play continues until one side has a 2-point advantage.
4. Players alternate serves every **2 points**. At deuce (10–10), service alternates after **each point**.

5. A player scores a point when the opponent fails to make a legal return or commits another fault.
6. During a rally, the ball generally must bounce **once on the opponent's side** before being returned.
7. If a served ball touches the net but otherwise lands correctly, it is a **let** and the serve is replayed.
8. In doubles, teammates must **alternate hitting the ball**.

TAKE NOTE

Singles: one player against one player.

Doubles: two players against two players.

Serve: starts each point and has specific requirements.

Spin: one of the most important features of table tennis; topspin, backspin, and sidespin can greatly change the ball's movement.

TAKE NOTE

Reaction time: players need quick reflexes because the ball travels rapidly over a short distance.

Footwork and positioning: good positioning is just as important as having strong strokes.

Sportsmanship: players should respect opponents, officials, and the rules of the game.

ACTIVITY

1. If you could choose one sport to play, which would you prefer, and why?
2. Identify at least three safety precautions and three examples of proper etiquette or sportsmanship that should be observed when participating in racket sports.
3. Explain how you can apply the skills, values, and lessons learned from playing sports to your daily life.

Criteria	
1. Personal Preference 5 Points	Clearly states a preferred sport and provides specific, thoughtful, and well-supported reasons.
2. Safety, Etiquette & Sportsmanship 5 Points	Identifies 3+ safety precautions and 3+ examples of etiquette/sportsmanship accurately and clearly.
3. Application to Daily Life 5 Points	Clearly explains how sports skills, values, and lessons can be applied to daily life, with specific examples.

TAKE NOTE

Table tennis can improve your:

Hand-eye coordination

Reflexes and reaction time

Balance and agility

Concentration

Cardiovascular fitness

Muscle coordination

Mental alertness
